PRESS RELEASE

MYDIGITAL ID STRENGTHEN MALAYSIA'S DIGITAL IDENTITY THROUGH KEY INDUSTRY PARTNERSHIPS

New MoUs with YWM, KTMB, CTOS, HONOR, Tune Talk, and XOX embed secure digital identity across transport, finance, and telecom, enhancing convenience, reducing fraud, and supporting national cybersecurity.

KUALA LUMPUR, 30 September 2025 – My Digital ID Sdn Bhd (MyDigital ID) today formalised a set of industry Memorandum of Understanding (MoUs) to expand adoption of Malaysia's national digital identity. The MoU exchange ceremony, held at Cyber Defence & Security Asia (CyberDSA) 2025, MITEC Kuala Lumpur, witnessed by YB Gobind Singh Deo, Minister of Digital.

The ceremony underscored the government's vision and commitment to advancing Malaysia's digital identity framework.

MoUs Signed
The MoUs aim to embed MyDigital ID into everyday services across public and private sectors. Partners announced today include:

Yayasan Waqaf Malaysia (YWM)	:	Exploring e-verification and Single Sign-On (SSO) for secure digital services.
Keretapi Tanah Melayu Berhad (KTMB)	:	Embedding MyDigital ID authentication in the KTMB Kits SuperApp.
CTOS Digital Berhad	:	Integrating MyDigital ID e-verification and SSO for financial services.
Honor Technology (M) Sdn Bhd	:	Preloading the MyDigital ID app on selected Honor devices.
Tune Talk	:	Adopting MyDigital ID e-verification and SSO for SIM card registration.
XOX Mobile	:	Collaborating with XOX to onboard and support the adoption of MyDigital ID.

Expected Impact
These partnerships will:

- **Accelerate user adoption** — by embedding MyDigital ID into commonly used apps and services for easier, more convenient access.
- **Reduce fraud and risk** — by strengthening electronic verification and authentication across sectors.
- **Support national digital transformation** — by providing a trusted identity layer that enables safe digital transactions and innovation.

Collaboration on Cyber Security
With the guidance and support of National Cyber Security Agency (NACSA) and industry partners, MyDigital ID is reinforcing its role as a secure and inclusive national digital identity, underpinned by robust cybersecurity measures to enhance resilience and public confidence.

Way Forward

Through these partnerships, MyDigital ID continues to advance Malaysia's digital identity ecosystem, delivering secure, convenient, and trusted access to digital services for all Malaysians. By placing safety and trust at the core of everyday digital interactions, this initiative supports the nation's digital transformation while safeguarding citizens' data and privacy.

#END#

About MyDigital ID (MYDID)

MyDigital ID is a secure and trusted digital identity platform designed to strengthen and simplify online identity verification, without replacing the MyKad system. It serves as a single sign-on solution for digital services, offering greater security and accessibility for Malaysians in accessing online services and carrying out transactions. MyDigital ID does not store any personal data, nor does it replace MyKad for identification purposes. Download the MyDigital ID app from major app stores: Google Play Store, Apple App Store, and Huawei AppGallery.
