JOB VACANCY: SENIOR ENGINEER – UI/UX DESIGNER

Location: Cyberjaya

About the Role:

We are looking for a highly skilled UI/UX Designer, to design and enhance user interfaces and experiences for the MyDigital ID platform across mobile, kiosk, and web applications. This role ensures a user-centric approach to digital identity interactions by delivering intuitive, visually appealing, and accessible designs that support security, efficiency, and inclusivity in national digital identity services..

Key Responsibilities:

- Collaborate with Business Analysts, and Developers to gather and understand user requirements and business goals.
- Translate concepts into wireframes, mockups, prototypes, and high-fidelity visual designs for mobile apps, kiosks, and responsive web platforms.
- Design interfaces in line with modern UX best practices, accessibility standards, and design principles relevant to digital identity systems.
- Maintain and evolve the UI style guide, design system, and component libraries for consistent branding and interaction patterns.
- Ensure design deliverables are technically feasible and aligned with front-end development capabilities.
- Keep up to date with UI/UX trends, tools, and emerging technologies.

Requirements:

- Bachelor's degree in graphic design, Interaction Design, Multimedia, Human-Computer Interaction (HCI), Computer Science, or related fields.
- Minimum 2–5 years of experience in UI/UX design, preferably in mobile-first government platforms, fintech, identity management, or secure systems.
- Proficiency in design and prototyping tools such as Figma, Adobe XD, Sketch, InVision. Justinmind and Axure (preferably Figma)
- Solid understanding of responsive design, mobile-first approaches, and kiosk interaction design.
- Familiarity with front-end technologies (HTML, CSS, JavaScript) for better collaboration with developers.

- Experience with design systems and component libraries.
- Understanding of accessibility (WCAG), usability principles, and secure design practices.
- Familiarity with tools like Google Analytics, Hotjar, or UXCam for user behavior insights.

How to Apply:

Kindly send your resume to hr@myid.my and shenaz.razak@myid.my with the subject line "Application for SENIOR ENGINEER – UI/UX DESIGNER ".
